DETAILED ACTION

1. The amendment filed on 6/30/2009 has been received and entered. Claims 20, 28, 31 and 39 as amended are pending in the application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Donald R. Boys (Reg. No. 35,074) on 10/28/2009.

3. The application is amended as follows:
 - a. The claims are amended as follows:

PROPOSED AMENDMENT

- i. Claim 20 is amended as follows:

Claim 20. A system for providing timing information to a microprocessor-controlled device having a set of mechanical functions that are started and stopped by a time-of-day (TOD), comprising:

a device including an integrated microprocessor for controlling the mechanical functions of the device;

an interactive interface presented on a display of a computer appliance, separate from the device, having a Universal Serial Bus (USB) port, enabling a user to select through the interactive display individual ones of the set of mechanical functions of the microprocessor-controlled device, and to select specific TOD for starting or stopping the mechanical functions selected; and

a thumb drive flash memory unit including a USB connector;

wherein the computer appliance saves the TOD selected for each mechanical function selected, in a form compatible with and executable by the microprocessor of the device, to the thumb drive through the USB port, the thumb drive to be carried to the microprocessor-controlled device and engaged to a USB port at the device, to upload the timing information to the microprocessor of the device, the microprocessor altering programmed mechanical functions of the device by executing the uploaded timing information for the mechanical functions of the device.

ii. Claim 31 is amended as follows:

Claim 31. A method for providing timing information to a microprocessor-controlled device including an integrated microprocessor for controlling a set of mechanical functions of the device ~~the mechanical functions~~ that are started and stopped by a time-of-day (TOD), comprising the steps of:

(a) selecting through an interactive display presented by a computer program specific to the microprocessor-controlled device on a monitor screen of a computer appliance separate from the device, individual ones of the set of mechanical functions of the microprocessor-controlled device;

selecting for the individual mechanical functions specific TOD for starting and stopping the mechanical functions;

saving the TOD for each selected mechanical function in a form compatible with and recognizable by the microprocessor of the device, to a thumb drive flash memory unit including a USB connector through a USB port of the computer appliance, to be carried to the microprocessor-controlled device and engaged to a USB port at the device, to upload to the microprocessor of the device the timing information; and altering programmed mechanical functions of the device by executing the uploaded timing information from the microprocessor of the device, thereby controlling the mechanical functions of the device according to the uploaded timing information.

Allowable Subject Matter

4. Claims 20, 28, 31 and 39 are allowed.
5. The following is an examiner's statement of reasons for allowance: The present invention teaches a remote interface for programming mechanical functions for a device. The claims are

allowable over the prior art in view of the examiner's amendment and the applicant's remarks filed on 06/30/2009.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
